George— My interest in these pages is the DeLoach operation and the FBI's 94 series files, for which I ask that you return this when you have finished it. One of the reasons I call it to your attention is the Mexico City matter, with the name withheld. This figures in continued CIA withholdings, including in the Mark Allen case, despite the fact that it is public domain. What really bugs the CIA and prompts its efforts to withhold the public domain is the legitimacy of Hoover's cracks about their irresponsibility in frightening the Commission with an obvious fabrication. That the CIA would do this boggles the mind. H 2/26/80
